

STAFF AUGMENTATION

Business Operations, Product & Engineering,
Managers, Engineers, IT

TOP 1% IT TALENT

We specialize in solid end-to-end delivery of tailor-made technology solutions designed by the Top 1% of IT Engineering teams. Our innate digital leadership identity powers transformation across every industry. We are always ready to drive meaningful change with a strategic vision for the future

DEDICATED TEAMS

With software managed services, EMR CPR's engineers are assigned to a particular client. Engineers are not allocated to other projects or accounts. Your team's know-how will help reduce risks along the way and will remain intact over the life cycle of EMRCPR's services.

24 / 7 RECRUITMENT PROCESS

We take recruiting very seriously. Our hiring process is constantly active to ensure immediate access to the best IT professionals in the market. We find the candidate with the best skills, experience, and personality to fit the job. It requires a series of collecting and reviewing resumes, conducting job interviews, and finally selecting and onboarding an employee to start working for the organization.

MAINTAIN OVERSIGHT & CONTROL

EMRCPR's engineers quickly integrate themselves with your internal team's processes, report directly to in-house management and participate actively in daily meetings and progress reports.

SAVE TIME

Comply with your deadlines and put our round-the-clock recruitment process to work for your team. Find the right professionals for every role in less time.

EXPERTISE

We rigorously test for logical/mathematical reasoning skills, technical ability and soft skills in our interview process. Only those engineers who score highly across each of these areas are presented to our clients.
